

Geppettos
CARPENTRY + ALTERATIONS

Providing expert advice with high quality workmanship on time and within budget.

We never sacrifice quality for time. Quality over quantity everytime.

I have been engaging with Geppetto's Carpentry and Brad Garth since 2016 when they undertook carpentry fit off work for the Curtin Medical School - Building 410 project. In the interim period Geppetto's has undertaken various works on our projects, and in particular has been utilized successfully by our maintenance team to undertake rectification works where required.

I have always found Brad and his team to be professional and skilled in completing their commitments with minimal fuss. Quality of workmanship is important to Georgiou and our clients, particularly regarding maintenance works, as it reflects on our reputations. Geppetto's has proven to be a capable and versatile contractor that I will continue to engage with.

JAMES BURROWS
PROJECT MANAGER AT GEORGIU

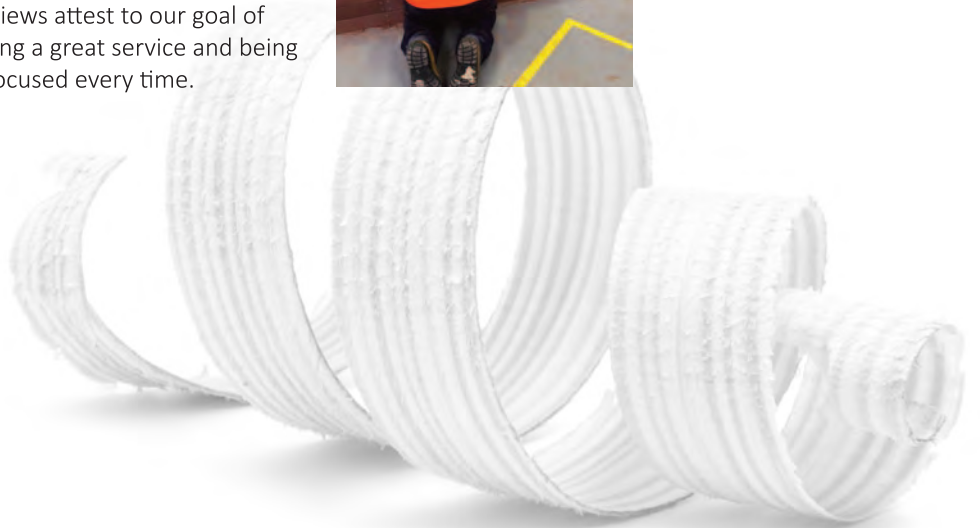

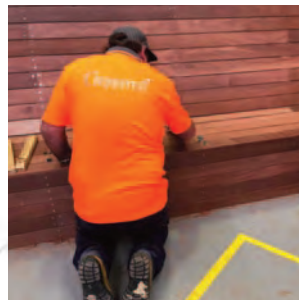

Geppetto's is a professional carpentry and alterations firm operating throughout the Perth Metropolitan area. We are a family owned business based in Cockburn and we have been servicing the residential and commercial sectors since 2009.

We provide expert advice and high quality workmanship on time and within budget. Our tradesmen are qualified and experienced with over 45 years combined experience in the trade industry. We complete each job to an exceptionally high standard.

We look forward to assisting you in your next project.

The **PERSONAL** TOUCH

We build relationships with each client which allows us to understand what they're looking to achieve by working with Geppettos. ***As a family business we value these relationships.*** We ensure our clients are kept fully informed of their project status along with any modifications. As such we welcome our client's questions, suggestions and ideas at any stage of the work. Our reviews attest to our goal of delivering a great service and being client focused every time.

Our **CAPABILITIES**

Internal Carpentry

We undertake all aspects of carpentry and joinery to an exceptionally high standard including but not limited to; skirtings, flooring, wardrobe cabinetry and sliding doors, balustrades, internal and external doors and window sills. We can advise on any type of carpentry project or ideas you have in mind for your home drawing on our vast experience and experts.

Domestic repairs and Home security

It's necessary to protect your home from infestations and water damage. We use the correct fixings and treated timbers to suit the clients needs. There are various levels of treatment which are used on the wood and through full consultation we can suggest what is best suited to the different applications on your property. We also repair termite damaged wood.

Should the worst thing happen and you experience a break in, our 24-hour emergency service means we can be with you as quickly as possible to secure your property and give you peace of mind.

External Carpentry

We understand that your outdoor areas are an extension of your living space. Whatever ideas you have from timber decking to privacy screens and pergolas we help to make them a reality. With our expertise any outside space can become a sanctuary and the only limit is your imagination. The external area of any property must be functional too so ask us about bespoke carports, all external doors and frames and double hung sash windows.

Renovations

Home renovation can be stressful due to the inherent upheaval and uncertainty. We aim to make the process as smooth as possible by communicating at every stage. Furthermore, you can be assured that highly qualified and experienced tradesman are working on your home. We specialize in extensions, wall removal, LVL installs and strip outs.

Commercial

An experienced commercial contractor we have worked across a range of industries; health, education, leisure, retail and industrial. As a sub-contractor, we understand the needs and requirements of our main contractor, especially fast-moving developments and challenging environments. We have a thorough appreciation of budget control.

Quality Team with a **SAFETY** Focus

Our qualified tradesmen are selected not only for their skill, but for their level of customer care and commitment to safety. Geppetos fosters a mature safety culture;

- all tools are maintained in excellent working order
- both the site area and equipment are thoroughly inspected before work starts for possible hazards
- work areas are kept clear of clutter and equipment
- wood dust is cleaned up regularly

Our mission is to provide expert advice and high quality workmanship, every time.

You will feel at ease with our trusted technical team who are industry certified; Working at Heights, Cm3 qualification and First Aid. In addition each of our team members has a current police check clearance.

PROJECT

Focus ONE

SOLUTION FOCUSED IN A CHALLENGING ENVIRONMENT

Situation

The Emergency Department of one of the largest private hospitals in Perth requested a quote for repair work. The major challenge in this project was to complete this work while maintaining the operation of the ED in sanitary conditions all the while complying with noise restrictions.

Solution

The ED of this hospital is one large open space where patients are received, triaged and treated. To eliminate any undesirable side effects of our repair work we chose to construct a temporary wall in the ED. This wall ensured patients entry to the ED was unaffected and that all procedures could continue as normal. The wall was sealed completely and locked to contain the building work. Air testing was in constant operation to ensure sanitary levels were maintained and there was no risk of contamination. To comply with noise restrictions we worked around the appointment schedule only undertaking noisy work once procedures were complete.

OUTCOME

Our client was able to maintain full operational service to patients while the repair work was carried out. By thinking creatively we were able to find a way to complete the work in this challenging environment. We also altered our project schedule to minimise noise disruption and ensure the business operations were unaffected. Success all round.

PROJECT

Focus TWO

RENOVATING A PROPERTY MEANS BEING PREPARED FOR SURPRISES

Situation

Our client asked us to remove some arches from the front of their home and to square off pillars around the entrance door and garage. During the removal of the arches, we realized that the roofline had dropped 80mm. It was obvious it had been like this for some time as the main load bearing beam did not have sufficient support and had moved. This is entirely unacceptable from both a safety and cosmetic point of view so we explained the situation to the homeowner and discussed the various options.

Solution

If the house beam resting on the pillar had been left it would have looked unsightly and become more unstable and dangerous. The client agreed that remedial work was required. Thereafter we removed the eve sheeting to open up the roof space and acro propped the rafters and main supporting beam. This in turn raised the section which had dropped. We installed a new beam and this reinstated the roof height and made the front entry safe again.

OUTCOME

Our client engaged us to alter the external appearance of their home. As work progressed and it became clear the original work would leave an unsightly dip in the eaves above the front door we realised the scope of the job had become much larger than expected. As highly qualified tradesmen, it was our responsibility to ensure the client understood the consequences of any action or inaction as regarding the dip. We kept the homeowner fully informed at every stage of the works as we reinstated the structure. As a result of our integrity, the client has a great looking doorway to their home that will remain safe for many years to come.

Our CLIENTS

At Geppetos we work on both residential and commercial projects. Our highly skilled team meet all your carpentry and alteration needs.

Commercial Buildings

Our aim is to avoid business disruption from day one. We work closely with all stakeholders to ensure we understand your operations. We are an experienced contractor engaged in ongoing commercial projects as a result of the quality of our work.

Residential Properties

Each client's home is unique in terms of size, build and décor. We understand your home is your sanctuary and it's important that any work we undertake improves your environment. From repairs to renovations and security, we are mindful of the upheaval to your home and we strive to keep it to a minimum. With Geppetos you have complete peace of mind that our tradesmen are highly qualified and client focused.
