

Karlka Fencewright

Supply · Install · Manufacture

Australia's Fencing Contractor of Choice

CAPABILITY STATEMENT

ABOUT KARLKA FENCEWRIGHT

Karlka Fencewright are 100% owned by the Karlka Nyiyaparli Aboriginal Corporation RNTBC. Specialising in the supply and installation of fencing and gate products. Established in 2010, Karlka Fencewright has fast become Australia's security fencing company of choice.

With proven capability across Australia (from major cities through to some of the country's most remote locations), the Karlka Fencewright team combines technical expertise with quality fencing products and safe, innovative installation techniques. We are proud to deliver professional security fencing solutions, as specified, on time and on budget.

The Karlka Fencewright Difference

Solution focussed

The Karlka Fencewright team has a reputation for providing effective, tailored security fencing solutions for projects large and small, across central and remote locations alike.

We deliver practical, quality outcomes and ensure a cost-effective, timely result, each and every time.

Seamless coordination

Karlka Fencewright is committed to providing regular, proactive and professional client communications to ensure seamless project delivery.

From initial enquiry through to project completion and sign-off, our friendly Karlka Fencewright team is contactable and available to answer all your queries.

Collaborative team

Karlka Fencewright's people are the building blocks of our success. Their passion for collaboration and commitment to successful outcomes sets us apart from our competitors.

Drawing from our wealth of experience and backed by a "can do" attitude, our team works closely with clients to provide tailored fencing solutions to meet their needs and exceed their expectations.

CAPABILITIES

Products, services and equipment

Products

Producing majority of our materials in house, we can tailor a solution to suit a range of client and project needs.

Our products include:

- Chainmesh security fencing
- Garrison security fencing
- Palisade security fencing
- Welded mesh (358) security fencing
- Wind / construction fencing
- Minesite fencing
- Heritage fencing and signage
- Stock fencing
- Temporary fencing
- Gates & Automation
- Bollards

Fabrication

At Karlka Fencewright, we offer custom fabrications and an extensive range of products produced in house by our experienced team of fabricators and wire specialists. This ensures our projects are always accurately quoted and scheduled, which sets us apart in the fencing industry. For our clients, this means their tailored turnkey solutions are delivered on time, on budget, every time.

We offer custom fabrication solutions across our range of products:

- Chainmesh security fencing
- Garrison security fencing
- Palisade security fencing
- Welded mesh security fencing
- Manual or automatic swinging gates
- Manual or automatic sliding gates
- Manual or automatic cantilever sliding gates

Our quality control is second to none, using only the best quality steel and wire. Our products are versatile, durable and are rigorously tested to ensure conformance to all relevant Australian standards and project specific specifications.

Services

Karlka Fencewright offers a comprehensive range of fencing services, tailored to meet our client's specific requirements.

Our services include:

- Fence installations nationally
- Fencing material supply only
- Fence maintenance and repairs
- Rock drilling

CAPABILITIES FOCUS

Mining Sector

Client

BHP - Village Security Project

Value

\$9.2M

Scope

Karlka Fencewright was contracted to supply and install 4,180 metres of Custom Garrison Security Fencing, and automated sliding gates at seven BHP mining camps near Newman, Western Australia.

We were also asked to support new landscaping, irrigation, and planting native flora. Artwork from a local Niyaparli artist was commissioned and transposed onto custom laser-cut aluminium sheets and installed on all fencing and gates.

Karlka Fencewright managed a workforce of over 60 people to complete the project, which also included demolition works and forming/pouring new concrete for footpaths and crossovers.

Challenges

The BHP Village Security Project presented a number of challenges to the Karlka Fencewright team. We were required to work around night shift rosters and engage with the public on all works being completed, which condensed the timeline for delivery.

Solutions

To meet the tight timelines and accelerate the process, Karlka Fencewright utilised its relationships with industry and quickly and efficiently onboarded new workers. We implemented management and supervision infrastructure to ensure teams were able to complete their work safely and efficiently. As a result, the project was completed safely, on time, and on budget.

CAPABILITIES FOCUS

Local Sector

Client

Water Corporation - Two Rocks Borefields Project

Value

\$260,398.00

Scope

Karlka Fencewright was contracted to supply and install 202 metres of Garrison Security Fencing to three bore compounds in Two Rocks, Western Australia. All fencing had to meet strict specifications and was supported by anti-dig plinths, anti-ram security bollards, custom manual boom gates, and manual sliding boom gates.

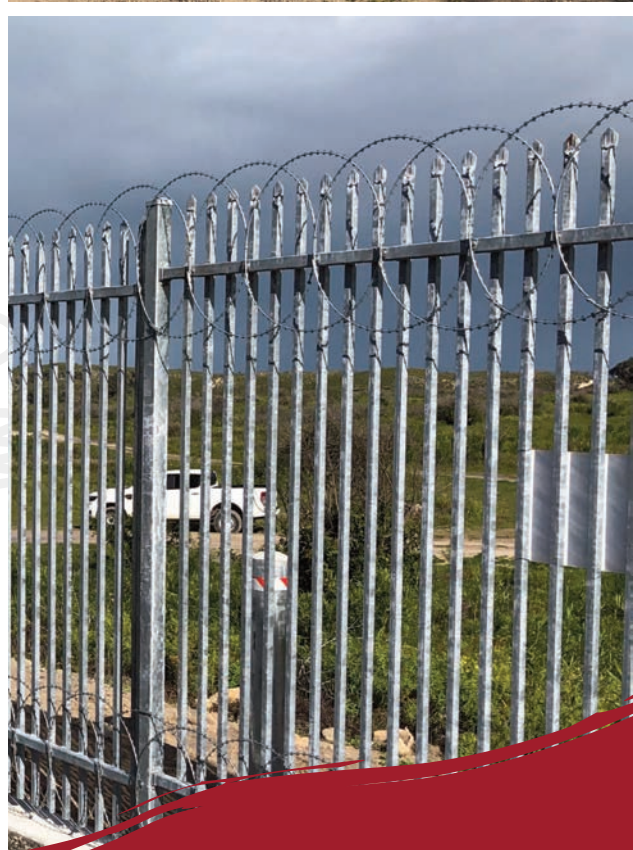

All materials were custom fabricated in Karlka Fencewright's manufacturing facility and hot dip galvanized (in accordance with AS4680 and Water Corporation specifications), to ensure longevity.

Challenges

The location of this project presented significant challenges to the Karlka Fencewright team. We were unable to use traditional delivery methods to transport the materials and concrete trucks were unable to navigate the dirt roads to get to each bore pad.

Solutions

To address the terrain and location challenges, our installation team thought outside the box and utilised a specialised 4x4 truck to transport materials. This alternative vehicle was capable of traversing tough terrain and carrying a substantial amount of material to the bore sites, reducing the amount of trips needed. This helped to keep the project on time and on budget. Our team also used a skidsteer-mounted concrete hopper to ensure we could quickly and safely navigate the dirt roads and complete concrete pours.

OH&S

Our Standards / Community and Cultural Engagement

OH&S

Quality, Health & Safety and Environmental (QHSE) management systems are embedded into everything we do - from tendering, to construction and the way we engage with and support our staff and clientele.

As part of our commitment to quality, safety and the environment, we have obtained accreditations in:

- ISO 45001:2015 (OHS Management System)
- ISO 14001:2015 (Environmental Management System)
- ISO 9001:2015 (Quality Management System)

We actively seek opportunities to improve the way we operate to ensure quality, health & safety and environmental impact are always front of mind.

Community and Cultural Engagement

Karlka Fencewright is dedicated to the protection of culturally significant sites across Australia.

We are proud to engage and work with local Aboriginal communities, Traditional Owners and Elders to ensure all cultural requirements are respected. Our employees participate in cultural awareness training. As a 100% Indigenous owned business, cultural and heritage education is a key component of our induction process for all our employees.

Identifying employment and training opportunities for Aboriginal employees (with a particular focus on the current and future generations of the Niyaparli people), is of great importance to the Karlka Fencewright team.

Karlka Fencewright collaborates with other employment providers to connect Aboriginal youth through cultural programs and pathways within the business. We strive to develop and instil a sense of belonging, meaning and purpose in Aboriginal youth to encourage connection, pride, empowerment and self-determination.

"We just wanted to say a massive thank you for the work that was recently completed at Christmas Creek. You guys were all a pleasure to deal with and we will keep you in mind for any future projects."

– Fortescue Metals Group Ltd
